The following is an examiner's statement of reasons for allowance: The applicant's analysis of Mock is correct in that the angle of the recess in Mock cannot be the same cone angle as that of the downstream surface. Further, the prior art of DE('218) that does appear to show identical cone angles does not show the downstream surface raised with respect to the upstream surface since the specification clearly indicates that raised is meant to mean that the cone of the downstream surface is smaller in diameter than that of the upstream partial surface. DE('218) teaches the opposite relationship.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Carl S. Miller whose telephone number is 703-308-2653. The examiner can normally be reached on MTWTHF.
